

EVO ACOUSTIC

Movable Walls

EF 100S

The EF 100S is a unique model customized for maximum height and maximum sound insulation.

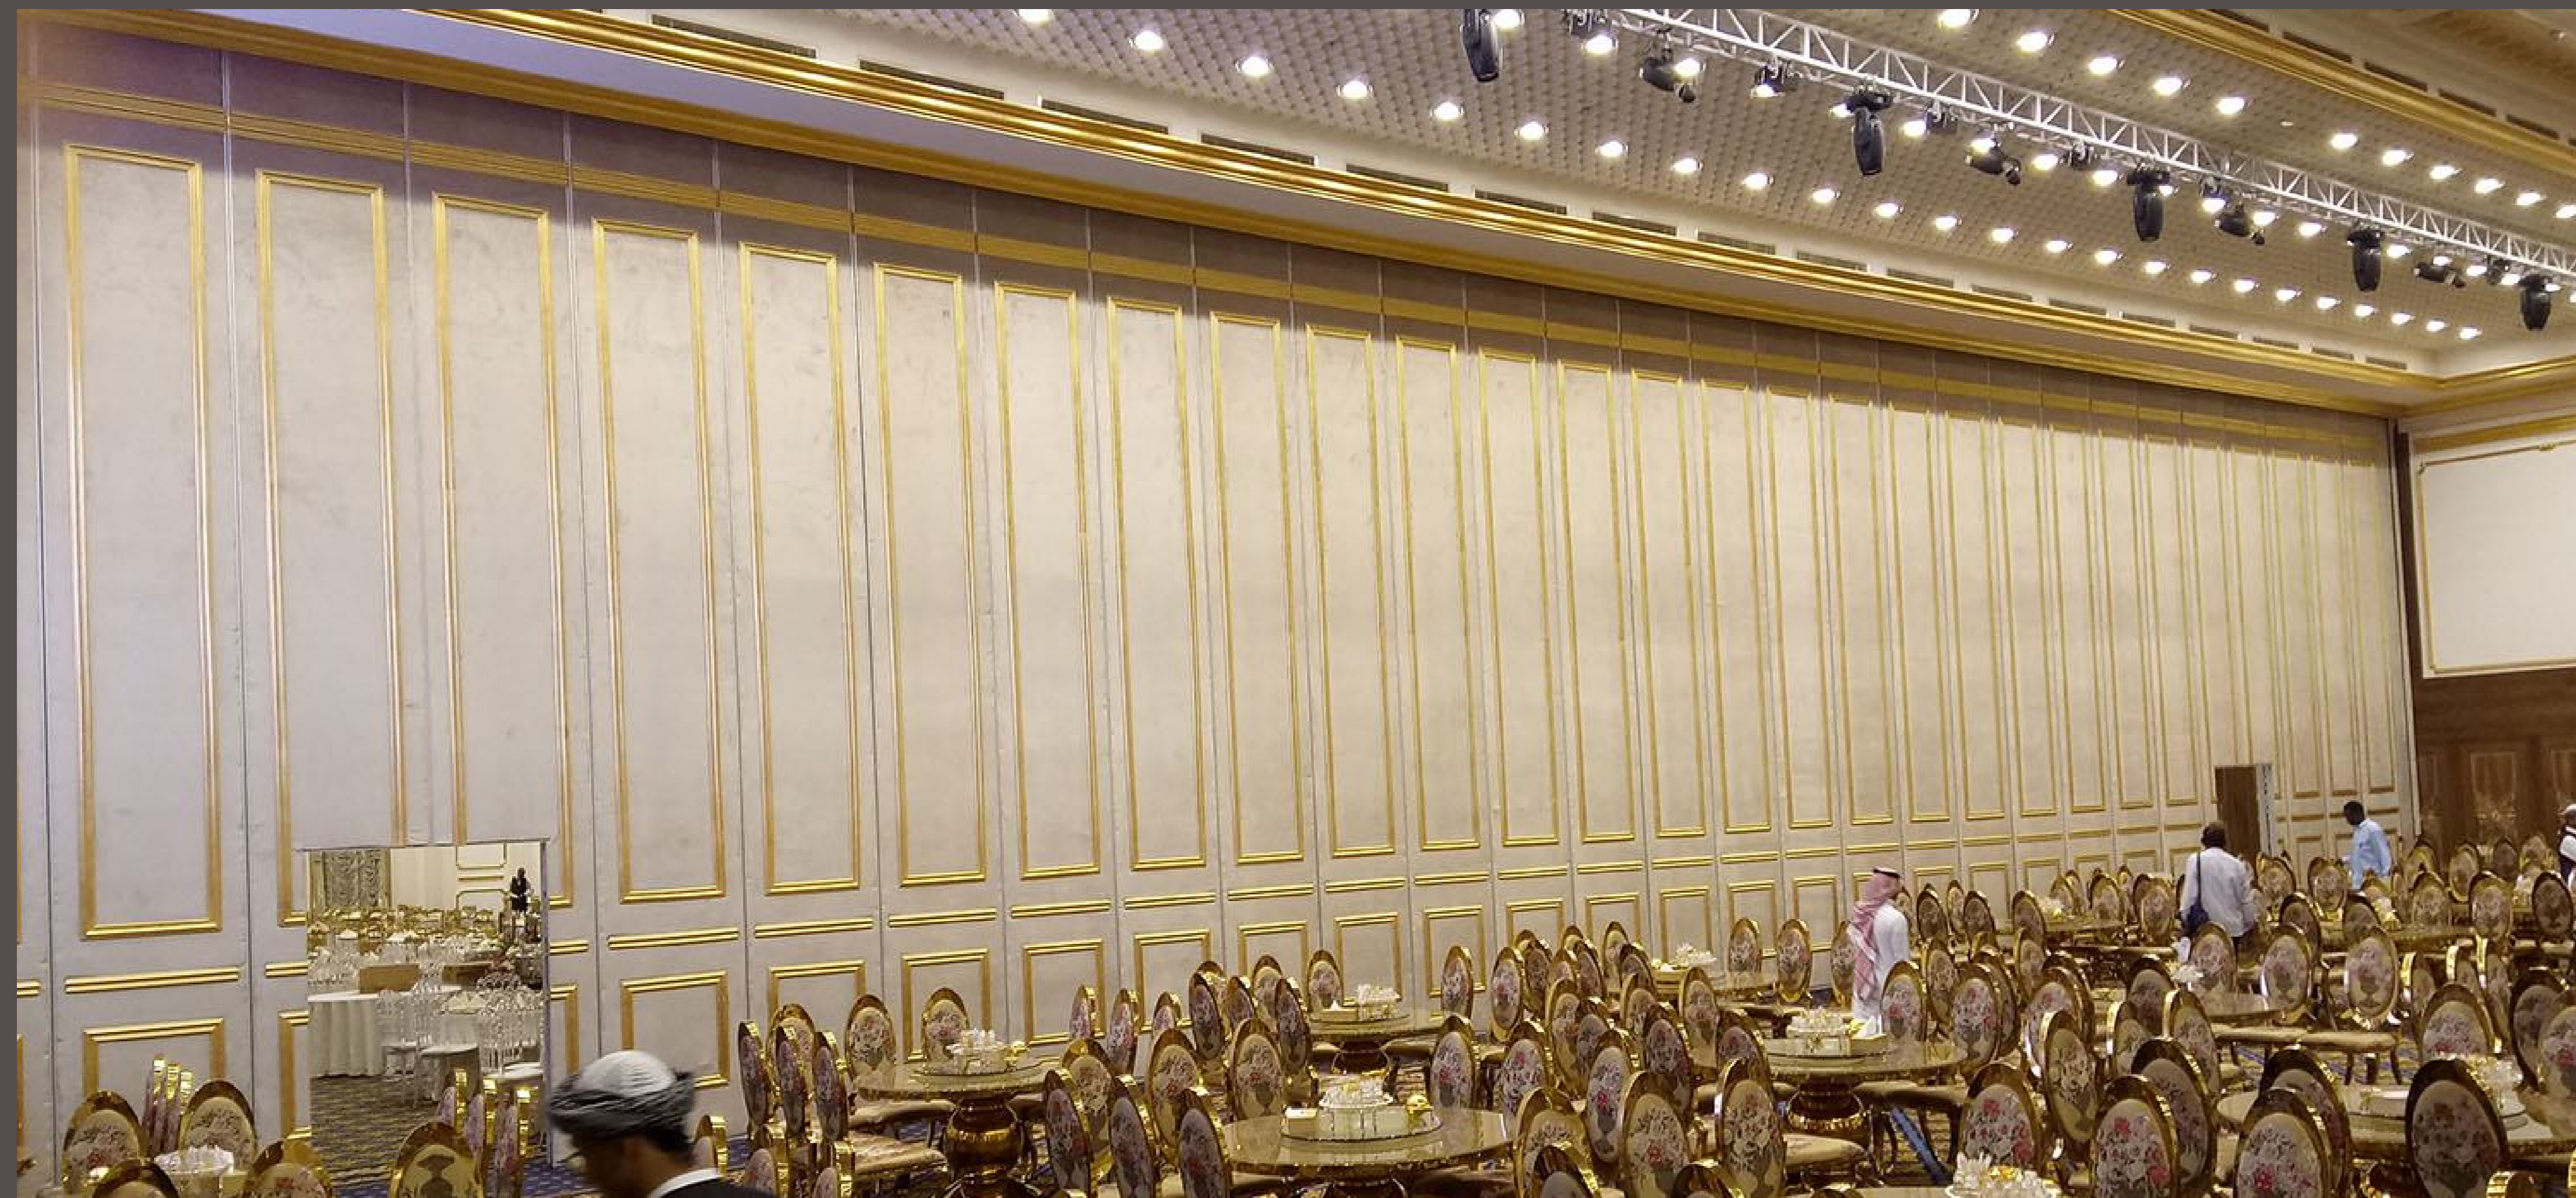

This robust movable wall satisfies even the toughest requirements, and proves that quality and design can be perfectly integrated.

The EF 100S can be adapted to suit the existing interior design from 6 to 17 meter height.

Its panels are only 100mm in thickness, and can provide 45dB, 50dB and even 53Db sound insulation. It is suspended by heavy duty suspension track systems, and will provide an amazing acoustic insulation in your new divided-up work and conference spaces.

Every wall is custom designed for your needs in the style of your choosing, foldaway and track lay - out.

For heights that are higher than 17 meters a custom solution can be provided.

EF 100

From offices to banquet and conference halls EF 100 movable wall will make every space flexible and even magical. It offers an excellent sound insulation (45dB, 50dB and 53dB) and a wide variety of finish materials and styles to accommodate every style you wish.

The unique suspension and trolley systems along with its strong locking mechanism makes it easy to move and fold but also safe and stable despite its size and weight.

Every wall is custom designed for your needs in the style of your choosing, foldaway and track lay - out.

EF 88

EF 88 movable wall has a hidden frame feature.
Its visible frame on the partition facade is only 2.5mm making it almost invisible.

EF 88 has a sound insulation of 40dB or 50dB.

It is suitable for multi-functional spaces and creates a clean and modern feel due to the thin lines between the wall panels. It is in popular use in hotels, places of worship, museums and more.

EF 85

EF 85 movable wall is only 85mm in thickness, this means minimal loss of space while retaining excellent acoustic properties. It is relatively light weight with height up to 5 meters, guarantees an optimal ease of operation, minimal loss of space and a very good stability.

EF 85 has a sound insulation of 40dB or 50dB.

These properties make it one of the most popular models for meeting rooms, classrooms, open-space offices, conference halls and all workspaces.

Every space becomes flexible and multi-functional, even magical.

It will be custom designed for your needs in the style of your choosing, foldaway and track lay - out.

EF 65

EF 65 movable wall is light and economical.

Its maximum height reaches 4 meters, with 65mm thickness and sound insulation of 30-35 dB it makes a great choice for restaurants, private rooms and even houses to create new temporary spaces and is also a great alternative to plaster walls.

EF 65 has a wide variety of finishes and styles to enrich your vision and fulfill your desires.

EF 75

EF 75 is a framed movable glass panel suitable to spaces with maximum height of 5 meter.

It has no floor track but it is very stable, strong and durable.

It has sound insulation capability of 15 to 25 dB.

EF 75 is often applied in offices, restaurants and other facilities.

Every wall is custom designed for your needs, foldaway and track lay - out.

EF 40

EF 40 creates a transparent environment.

It has no visible frame and its maximum height is 3 meters.

Its properties make it highly common in restaurants with out-sitting areas that wish to make them available during the winter or even in the summer to enable an air-conditioning and also for stores who wishes to show their goods even when they are closed.

It is also used in offices especially in High tech where it is used as a white board substitute

Every wall is custom designed for your needs, foldaway and track lay - out.
